

Vale of Evesham School

'a specialist school for cognition and learning - enabling inclusion in the community'

Working together with Early Years children

At the Vale of Evesham school we work hard to ensure high quality collaborative working with our partner Early Years Settings. If a child attends Vale of Evesham nursery and another setting we will arrange a liaison visit into the mainstream setting twice each term. We will share assessment, targets and strategies to support behaviour, movement, communication and thinking skills. We will arrange a time for colleagues to visit us in nursery and observe practice. If appropriate we will loan resources and offer advice on appropriate resources and activities.

For further information about working together with pre-school children please contact us here at school.
